About the **Pacific Institute**

The Pacific Institute is one of the world’s leading nonprofit research and policy organizations working to create a healthier planet and sustainable communities. Based in Oakland, California, we conduct interdisciplinary research and partner with stakeholders to produce solutions that advance environmental protection, economic development, and social equity – in California, nationally, and internationally. We work to change policy and find real-world solutions to problems like water shortages, habitat destruction, climate change, and environmental injustice.

Since our founding in 1987, the Pacific Institute has become a locus for independent, innovative thinking that cuts across traditional areas of study, helping us make connections and bring opposing groups together. The result is effective, actionable solutions addressing issues in the fields of freshwater resources, climate change, environmental justice, and globalization. More information about the Institute and our staff, directors, funders, and programs can be found at www.pacinst.org.
About the **Authors**

**Heather Cooley**

Heather Cooley is the co-director of the Pacific Institute’s Water Program. Her research addresses the connections between water and energy, sustainable water use and management, and the impacts of climate change on water resources. Ms. Cooley is a recipient of the Environmental Protection Agency’s Award for Outstanding Achievement and serves on the Board of Directors of the California Urban Water Conservation Council. She also serves on the California Commercial, Industrial, and Institutional Task Force and the Urban Stakeholder Committee. Ms. Cooley received a B.S. in Molecular Environmental Biology and an M.S. in Energy and Resources from the University of California at Berkeley.

**Kristina Donnelly**

Kristina Donnelly is a research associate with the Pacific Institute’s Water Program. Her research addresses the social, economic, and policy implications of water conservation, conflict management over transboundary water resources, and water policy in North America and the Middle East. Ms. Donnelly received a B.S. in Mathematics from American University and an M.S. in Natural Resources and Environment from the University of Michigan. She was the 2008/09 Sea Grant Fellow with the Great Lakes Commission in Michigan. Before joining the Institute, she worked for the Center for Transboundary Water Management at the Arava Institute for Environmental Studies in southern Israel, conducting transboundary water research and facilitating educational opportunities between Israelis, Jordanians, Palestinians, and other nationalities.
